GUNPORN - "Pretty pretty please"

[OB 22]

11 tracks from this international freak hop crew. Take 4 well skilled, fast MC 's and a crazy producer who writes weird, partly breakcore influenced instrumentals, which occasionally double their tempo to drum 'n bass/ breakcore speed (which is fun). The mcs are bleubird, marcus graap, siaz and the homesick nomad - so there is a huge variety of different styles from hard britcore-alike raps to melodic parts where the guys actually sing. This isn't conventional hiphop, but sophisticated electronics with a dark, melancholic mood. Sometimes pretty aggressive with distorted synthlines. Best record we heard in a while. Just check the link to listen to some mp3 files of this album. Oh, and for the "high" price: this label actually pays the MCs (unlike me)! Check also the video for "deaf people dance" on the homepage of the offbeaters, it 's pretty, pretty hardcore!

Format: LP
